AGENCY REVIEW COMMENTS

INSTRUCTIONS: To be completed by review agency and returned to State Clearinghouse. Check one or more appropriate boxes. Indicate comments below. Return copy 1, 2 and 3 to the State Clearinghouse. Retain copy 4 for your official records. Attach triplicate sheets if necessary.

PART I: Declaration of Interest

No Interest Declared — Complete Part V and return copy 1 and copy 2 to State Clearinghouse.

Interest Declared — Complete Parts II, III, IV and V and return copy 1 and copy 2 to State Clearinghouse.

PART II: Identification of Agency Review Criteria (Agency plans, programs, policies and/or laws)

We have reviewed Susquehanna Steam Electric Station's application for Nuclear Regulatory Commission. Our review is in accordance with Section 106 of the Historic Preservation Officer's role in the Advisory Council on Historic Preservation's procedures for the protection of historic properties.

PART III: COMMENTS (Include results of preliminary contact made with applicant and suggestions for improving project proposal)

This report adequately addresses cultural resources in the project area.

PART IV: Recommended State Clearinghouse Action (This action will not be honored by the State Clearinghouse unless Part II and Part III above have been completed)

Recommend Approval

Request the opportunity to review final application.

Recommend Disapproval

Request the opportunity to review environmental impact statement

SUBJECT: 5-79-07-003
Addendum to Comments on Draft EIS -
Susquehanna Steam Electric Station

TO: Richard A. Heiss, Supervisor
Pennsylvania State Clearinghouse

FROM: CLIFFORD L. JONES 
Secretary
Department of Environmental Resources

RECEIVED
OFFICE OF
THE BUDGET
AUG 29 4 13 PM '79

The following concern should be added to the Department's comments on this Draft Environmental Statement -

(6) Air Quality

The Draft ES should consider the possible system-wide effects of use of the Susquehanna Steam Electric Station as a new base-load facility. The Department would anticipate that one or more coal-fired stations in the system would consequently become peaking or stand-by facilities. This may cause increased emissions unless measures are taken to avoid more frequent cold start-ups. The effects on ambient air-quality of more-frequent start-ups at such stations should be studied.
