# SEDA - COUNCIL OF GOVERNMENTS.

TIMBERHAVEN, RD 1 • LEWISBURG, PENNSYLVANIA 17837 • 717 524-4491

September 26, 1979

Mr. S. Singh Bajwa  
Division of Site Safety and Environmental Analysis  
Office of Nuclear Reactor Regulation  
United States Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Bajwa:

SEDA-COG is the Areawide A-95 Clearinghouse for a ten-county region in Central Pennsylvania. Acting in its role of A-95 Clearinghouse, the staff of SEDA-COG has reviewed the Draft Environmental Statement related to operation of the Susquehanna Steam Electric Station (SSES), Units 1 and 2 (Docket No's. 50-387 and 50-388). SEDA-COG's interest is related to the proximity of the SSES to our region, and the potential impact of the SSES in the region. It is our contention that one major omission needs to be addressed in the environmental statement. According to the new regulations of the Council of Environmental Quality:

"(c) Agencies:

- (1) Shall prepare supplement to either draft or final environmental statement if

\* \* \*

- (ii) There are significant new circumstances or information relevant to environmental concerns and bearing on the proposed action and its impact. (43 Federal Register 55978, 1502.9 (c) )"

The accident at the Three Mile Island nuclear facility certainly qualifies as a significant new circumstance. We believe it is imperative, therefore, that the environmental statement include an analysis of the natural and human environmental impacts associated with the TMI accident as a basis for evaluating potential impacts at the SSES, should an accident ever

occur. The addition of this information will greatly strengthen the environmental statement, and will help reassure the public that Pennsylvania Power and Light Company and the Nuclear Regulatory Commission are thoroughly evaluating and mitigating the effects of any potential accident.

Sincerely,

A handwritten signature in cursive script that reads "Dennis E. Robinson".

Dennis E. Robinson
