SUSQUEHANNA STEAM ELECTRIC STATION  
INTERIM REPORT OF A DEFICIENCY IN  
CABLE PULLING ACTIVITIES (STATUS UPDATE)  
ERS 100450/100508 FILE 840-4  
PLA-429

Dear Mr. Grier:

The damage sustained by safety related cables during cable pulling activities and reported in our PLA-383 of July 17, 1979 to the Commission under the provisions of 10 CFR 50.55(e) remains under investigation. Our architect engineer, Bechtel Corporation, has recently provided PP&L a preliminary report which is not yet suitable for formal submittal.

Bechtel has further indicated that a final report is forthcoming by December 31, 1979. Therefore, we request an extension from the originally scheduled date until March 1, 1980 for submittal of a final definitive report.

We will continue to aggressively pursue this problem and will advise the Commission of the results of our evaluation once the final report is available from Bechtel.

Very truly yours,

N. W. Curtis  
Vice President-Engineering & Construction
