BROWNS FERRY NUCLEAR PLANT - TVA BFN TS 227

In accordance with the provisions of 10 CFR 50.4 and 50.90, we are submitting a request for amendment to licenses DPR-33, DPR-52, and DPR 68 to change the technical specifications of Browns Ferry Nuclear Plant units 1, 2, and 3 (enclosure 1).

These proposed specifications revise the limiting conditions for operation to require that a later standard be used for iodine testing and analysis of charcoal filter samples. This amendment request is in response to item 3D of Office of Inspection and Enforcement Inspection Reports 50-259, 50-260, 50-296/85-57 submitted to NRC by our letter dated March 24, 1986. Description, reason for change, and justification in support of the proposed changes are provided in enclosure 2. A proposed determination of no significant hazards consideration is provided in enclosure 3.

Enclosed is a check for \$150 amendment fee required by 10 CFR Part 170.12.
