BROWNS FERRY NUCLEAR PLANT (BFN) - TVA BFN TS 228

In response to a request from the Browns Ferry Nuclear Plant Project Manager, we are agreeing to a revision of BFN TS 228 which was submitted on April 3, 1987. This revision will result in the withdrawal of one change item in the original submittal. The item was originally proposed in response to a BFN Resident Inspector concern (Inspection Report 85-05-07). The open item dealt with the interpretation of the surveillance instruction operability requirements concerning the testing of the Reactor Building, Reactor Zone, and Refuel Zone radiation monitors listed in table 3.2.A of the technical specifications. After discussions with the Resident Inspector and the Project Manager in a meeting on October 29, 1987, it was decided that the concern could be resolved through a procedure revision without requiring a technical specification change.

JAN 22 1988

U.S. Nuclear Regulatory Commission

We have revised the description, reason for change, and justification (enclosure 2), and the proposed determination of no significant hazards consideration (enclosure 3) of the original submittal to reflect this change and to incorporate certain clarifications as also requested by the project manager.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

R. Gridley, Director
Nuclear Licensing and
Regulatory Affairs
