Docket Nos. 50-259  
50-260  
50-296

BROWNS FERRY NUCLEAR PLANT (BFN) - TVA BFN TECHNICAL SPECIFICATION 231  
SUPPLEMENT

By letter dated May 29, 1987, TVA requested an amendment to licenses DPR-33, DPR-52, DPR-68 to change the BFN technical specifications for units 1, 2, and 3. This amendment implements the recommendations contained in Generic Letter 84-15, "Proposed Staff Actions to Improve and Maintain Diesel Generator Reliability." In discussions with the staff, it has been determined that a revision to the initial submittal is required to better implement the recommendations of the generic letter. Enclosure 1 contains the revisions. This amendment has been identified as a restart requirement and assigned NRC tracking numbers 00092, 00093, and 00094 for units 1, 2 and 3 respectfully. It should be noted this submittal is a supplement to the initial submittal.
