Gentlemen:

In the Matter of)
Tennessee Valley Authority)

Docket No. 50-260

BROWNS FERRY NUCLEAR PLANT (BFN) - UNIT 2 - SAFETY SYSTEM FUNCTIONAL
INSPECTION (SSFI) REPORT NO. BFA 88811

TVA is submitting a revised cover letter for the subject report as requested
by G. E. Gears, TVA Project Manager, NRC Office of Special Projects.

SSFI Report No. BFA 88811 considers the emergency equipment cooling water and
the residual heat removal service water to be functional. The inspection was
a TVA managed task with joint participation by TVA and Energy Resources
Company, International (ERCI).

Currently, affected BFN organizations are preparing recommendations for each
inspection observation. These recommendations and subsequent corrective
actions should provide confidence in the functional readiness and restart of
BFN.

The enclosures do not contain proprietary information as previously reported.
The contractor's representative, Gary J. Overbeck of ERCI, states that their
inspection methods are no longer proprietary information. Therefore, please
withdraw the proprietary statement of our earlier submittal.

If you have any questions, please telephone Patrick Carier at (205) 729-3570.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
