Dear Mr. Kingsley:

SUBJECT: NRC INSPECTION REPORT NOS. 50-259/89-03, 50-260/89-03 AND
50-296/89-03

This refers to the Nuclear Regulatory Commission inspection conducted by D. R. Carpenter on January 1-31, 1989. The inspection included a review of activities authorized for your Browns Ferry facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection included operational safety verification, refueling activities, review of fuel loading procedures, surveillance observations, maintenance observations, restart test program, cold weather preparations, health physics survey, followup of open inspection items, and licensee action on previous enforcement matters. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Within the scope of the inspection, no violations or deviations were identified.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
