Docket Nos. 50-259
50-260
50-296

**BROWNS FERRY NUCLEAR PLANT (BFN) - TVA BFN TECHNICAL SPECIFICATION (TS)
NO. 292 - REVISION TO FIRE PUMP SURVEILLANCE REQUIREMENTS**

In accordance with the provisions of 10 CFR 50.4 and 50.90, we are submitting a request for an amendment to licenses DPR-33, DPR-52, and DPR-68 to change the BFN Technical Specifications for units 1, 2, and 3 (Enclosure 1). This proposed amendment revises the surveillance requirements for flow and head for the electric and diesel-driven fire pumps based on a calculation of actual water demand.

A summary of the proposed changes is provided by Enclosure 2. The reason and justification for the proposed changes is provided by Enclosure 3. A proposed determination of no significant hazards consideration is provided by Enclosure 4. The new pump values are adequate for unit 2 operation with units 1 and 3 shutdown. Enclosure 5 documents TVA's commitment to review and reconfirm the adequacy of the unit 1 and 3 pump values prior to restart of those units. TVA requests that these changes be made effective 30 days after approval by NRC.

This technical specification change is required for the restart of BFN unit 2. TVA requests it be approved prior to December 1, 1990. If there are any questions about these changes, please telephone Patrick P. Carrier at (205) 729-3566.

Very truly yours,
