ATTN: Mr. Dennis Lawyer

Mr. Lawyer,

This letter serves as our notification and request to withdraw the extension you received from our facility dated 26October2017.

On December 21, 2017 licensed radioactive material (14C) was used in Hall Atwater Laboratories in a new experiment in our Biochemistry program. We expect to continue using this material for the near future.

At this time we respectfully request withdrawal of our previous notification to NRC due to lack of principal activity. This experiment resumes use of 14C and 3H in our research facility.

Thank you for your time and consideration with respect to this notification. Please do not hesitate to contact me [wnelligan@wesleyan.edu](mailto:wnelligan@wesleyan.edu) or 860-685-2771 should you have any question or comments regarding this request.

Sincerely

William S. Nelligan  
Director / Radiation Safety Officer  
Environmental Services
