This proposed amendment supplement will add a footnote to Section 3.7.D, Containment Systems, for all three units. The footnote will state that locked or sealed closed valves may be opened on an intermittent basis under administrative control. The proposed changes in the supplement also change Bases Section 3.7/4.7, and Definitions Section 1.0, Paragraph O.1, on Primary Containment Integrity. The changes make the proposed Technical Specification wording in accordance with guidelines of Generic Letter 91-08.

Description, reason for change, and justification in support of the proposed changes are enclosed (Enclosure 2). A proposed determination of no significant hazards consideration is provided in Enclosure 3.

If you have any questions, please telephone G. D. Pierce at (205) 729-7556.

Sincerely.
