[illegible]

The image shows a document page, likely a ledger or form, with a header section at the top and several rows of data below. The text is extremely faint and difficult to read due to high contrast and noise. The page is divided into sections by horizontal lines. The top section contains a header with text that is mostly illegible. Below the header, there are several rows of data, each starting with a small, dark, circular marker. The text is extremely faint and difficult to read. The bottom section appears to be a footer or a summary area, also containing illegible text. The overall quality is poor, with many black specks and streaks throughout the image.

NIAGARA MOHAWK POWER CORPORATION/300 ERIE BOULEVARD WEST, SYRACUSE, N.Y. 13202/TELEPHONE (315) 474-1511

April 21, 1980

Mr. Harold Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Denton:

Re: Nine Mile Point Unit 2  
Docket No. 50-410

Pursuant to Section 50.55a (a) (2) (ii) of 10 C.F.R. Part 50, Niagara Mohawk Power Corporation requests authorization to invoke ASME Section III Code Case N-242 entitled "Materials Certification" on Nine Mile Point Unit 2. Although not currently listed in Regulatory Guide 1.85, the subject Code Case has been prepared and issued by ASME to resolve earlier misinterpretations relating to certification of code materials. The use of this Code Case was approved for the SNUPPS plants by Mr. Olan D. Parr of your staff in a letter dated July 13, 1979.

Niagara Mohawk needs to use this Code Case where applicable for the certification of materials purchased for Nine Mile Point Unit 2.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

  
James Bartlett  
Executive Vice President
