Dr. Thomas Murley  
United States Nuclear  
Regulatory Commission  
Region I  
631 Park Avenue  
King of Prussia, PA 19406

Dear Dr. Murley:

In accordance with previous discussions with Niagara Mohawk Power Corporation (NMPC) and Region I of the Nuclear Regulatory Commission (NRC), Management Analysis Company (MAC) is submitting a revision to Volume I of the final report of the independent review of Nine Mile Point Unit 2 (NMP-2) related NRC CAT inspections, SALP report and NMPC identified deficiencies.

The purpose of this revision is to clarify the report and to report data in the same manner as presented orally to NMPC and the NRC on November 14, 1984 and in the written interim reports for Phase I, II and III. The changes are consistent with detailed results of the review as shown in Volumes II and III of the report, which remain unchanged, and with supporting documentation in project records.

If there are any questions relating to these changes, please contact me. I will be pleased to meet with the NRC and NMPC if necessary.

Sincerely,

*J. M. Norris*
