## General Comment

Regarding Docket ID NRC-2017-0211 -- Handling of Nuclear waste requires a long term solution. Why the urgency to close public comments so quickly? This current proposal puts 100's of thousand of residents at risk (earthquake, Tsunami, rising ocean levels) and one of our country's leading Marine training bases as well. Consider if you lived within 50 miles of this site, would you want your family at risk or other people you know and love? Please give us more time to get local input to this proposed solution that doesn't consider the long view.

Thanks.
