

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

August 11, 1998

Mr. J. A. Scalice
Chief Nuclear Officer
And Executive Vice President
Tennessee Valley Authority
6A Lookout Place
1101 Market Street
Chattanooga, Tennessee 37402-2801

SUBJECT: STAFF EVALUATION RE: CORRECTIVE ACTION PLAN FOR RESOLUTION
OF CONTROL ROOM EMERGENCY VENTILATION SYSTEM ISSUES FOR
BROWNS FERRY NUCLEAR PLANT UNITS 1, 2 AND 3 (TAC NOS. M99711,
M99712, M83348, M83349, AND M83350)

Dear Mr. Scalice:

This letter documents our evaluation of your corrective actions relating to the control room emergency ventilation system (CREVS) at Browns Ferry Nuclear Plant (BFN) Unit Nos. 1, 2 and 3.

Based on the information provided by the Tennessee Valley Authority relating to the control room habitability corrective action plan, the staff finds that there is reasonable assurance that the BFN control room will provide adequate radiological protection such that control room personnel will not receive radiation exposures in excess of 5 rem whole body, or its equivalent to any part of the body, from postulated accidents occurring at Units 2 or 3. Our evaluation is attached.

This completes our effort under technical assignment control (TAC) nos. M83348, M83349, and M83350 and the TACs are closed.

Sincerely,

A handwritten signature in black ink, appearing to read "L. Raghavan", written over a horizontal line.

L. Raghavan, Senior Project Manager
Project Directorate II-3
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation
