SUSQUEHANNA STEAM ELECTRIC STATION  
PROPOSED AMENDMENTS 63 TO NPF-14 AND  
17 TO NPF-22  
ER 100450 FILE 841-8  
PLA-2407

Docket Nos. 50-387  
50-388

Dear Mr. Schwencer:

The purpose of this letter is to propose a common change to the Susquehanna Steam Electric Station Unit 1 and Unit 2 Technical Specification, Section 6.5. The changes are attached to this letter in marked-up form.

Currently the Technical Specifications for SSES Unit 2 and as proposed to be modified for SSES Unit 1 (ref. proposed Amendment 42 to License No. NPF-14, appropriate page attached) restrict the composition of the Susquehanna Review Committee (SRC) to nine individuals. This "single-integer" restriction causes two problems:

1. When additional expertise is required, either a current voting member must be "replaced" temporarily or the more expert individual must be relegated to a non-voting status.
2. When a vacancy is created on the current SRC roster, a replacement must immediately be found.

The purpose of this proposal is to provide additional flexibility, thereby relieving the above problems. A quorum will consist of a majority of the membership most recently established on the roster of SRC members approved by the Senior Vice President-Nuclear. Each new member chosen will still have to meet the qualification requirements stated in Technical Specification 6.5.2.2.

SSES PLA-2407  
ER 100450 File 841-8  
Mr. A. Schwencer

No Significant Hazards Considerations

The proposed changes do not:

- (1) involve a significant increase in the probability or consequences of an accident previously evaluated,
- (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or
- (3) involve a significant reduction in a margin of safety.

This assessment is based on the discussion above which indicates that this change is purely administrative in nature. It therefore is an example of a change not likely to involve significant hazards considerations per 48FR14870, paragraph (i).

Any questions regarding this proposal should be directed to Mr. R. Sgarro at (215) 770-7855. Pursuant to 10CFR170.22, the appropriate fee is enclosed.

Very truly yours,

N. W. Curtis  
Vice President-Engineering & Construction-Nuclear
