Susquehanna Training Center
Response to NRC Inspection of
Training Programs Questions
PLES 3956 File A14-2C

Dear Mr. Howe:

This letter provides the answers to the two remaining questions raised during the recent inspection of training at Susquehanna.

1. Susquehanna Training Center Procedure-QA-324, Technical Exam Bank, is in effect for I&C Training examinations. Instructors have been counseled concerning the importance of writing examinations in accordance with this new standard. All I&C course examinations will be reviewed and, if necessary, revised to comply with the procedure prior to administration.
2. Training for Health Physics Technicians concerning system operations that cause transient high radiation levels will be developed. This training will be taught to the next initial HP Technician class and will be included in the HP Technician Continuing Training Program in 1990.

William H. Lowthert
Manager-Nuclear Training

Response: No
