0 2	During normal plant operation, a fitting in the fire protection piping
0 3	for the A Cooling Tower broke. Because the resulting leakage could not
0 4	be isolated, the fire pumps were stopped and placed in manual. This
0 5	condition is less conservative than allowed by TS 3.22.2. Condition
0 6	lasted for 28 minutes, during which the pumps could have been manually
0 7	started to provide fire fighting water if needed. Event had no adverse
08	Leffect on public health or safety.
0 9	SYSTEM CAUSE CODE SUBCODE COMPONENT CODE SUBCODE SUBCO
	The pipe break resulted from freezing weather conditions. Repairs have
1101	
TT	been completed.
