General Comment

Please notice

This Rule must not have a negative effect on small disadvantaged business's that were given misrepresentations after submitting a business concern. Claims that \$100 million dollars will have a major effect on the us economy are not true and must be considered un-just fraudulent misrepresentations.

For a flow through entity tort is the only source of compensation, when a small disadvantaged flow through entity requests compensation damages must be awarded. To be a flow through entity without any type of compensation is employment discrimination, and in my view a type of new era slavery.

Please don't allow small business to suffer in such a major way, and allow small business to collect restitution from damages lost due to misrepresentation. This is also a request for an opportunity to sole source or establish copyright protection, if restitution isn't an option.
