Docket No. 50-255
LS05-81-03-015

Mr. David P. Hoffman
Nuclear Licensing Administrator
Consumers Power Company
1945 W Parnall Road
Jackson, Michigan 49201

Dear Mr. Hoffman:

SUBJECT: SEP TOPIC VI-1, ORGANIC MATERIALS AND POST ACCIDENT
CHEMISTRY (PALISADES PLANT)

Enclosed is a copy of our draft evaluation of Topic VI-1, "Organic Materials and Post Accident Chemistry" for the Palisades Plant. This assessment compares your facility as described in Docket No. 50-255 with the criteria currently used by the regulatory staff for licensing new facilities. Please inform us if your as-built facility differs from the licensing basis assumed in our assessment within 30 days of receipt of this letter. If we do not receive comments in that time we will assume it is correct.

This evaluation will be a basic input to the integrated safety assessment for your facility unless you identify changes needed to reflect the as-built conditions at your facility. This assessment may be revised in the future if your facility design is changed or if the NRC criteria relating to this subject is modified before the integrated assessment is complete.

Sincerely,

Dennis M. Crutchfield, Chief
Operating Reactors Branch #5
Division of Licensing

Enclosure:
As stated
