Director, Nuclear Reactor Regulation
Att Mr Dennis M Crutchfield, Chief
Operating Reactors Branch No 5
US Nuclear Regulatory Commission
Washington, DC 20555

DOCKET 50-255 - LICENSE DPR-20 - PALISADES
PLANT - ENVIRONMENTAL QUALIFICATION
OF SAFETY-RELATED ELECTRICAL EQUIPMENT

This letter submits Consumers Power Company's response to the May 28, 1981 letter and Safety Evaluation Report on Environmental Qualification of Safety-related Electrical Equipment for the Palisades Plant. The letter and SER were received June 5, 1981. The Safety Evaluation Report evaluated our submittal on equipment qualification dated October 7, 1980. Our submittal was subsequently revised on October 30, 1980 and June 11, 1981. The purpose of the enclosures to this letter is to respond to the 90-day request contained in the Safety Evaluation Report to the fullest extent possible.

There are five enclosures with this letter. The first summarizes our position in response to the generic questions raised by the SER. The second enclosure consists of four tables related to equipment qualification. The third, fourth and fifth enclosures are plant specifications on equipment qualification. These specifications replace our revised report on equipment qualification in total.

David P Hoffman
Nuclear Licensing Administrator

CC Director, Region III, USNRC
NRC Resident Inspector-Palisades
