

Incident Report for Shortnose and Atlantic Sturgeon – Indian Point

Part I – For All Observed Sturgeon

Date of Observation:

Time of Observation:

Reported By (name and contact information):

Location Observed:

IP2 fish-return sluice (tank-based monitoring)

IP3 fish-return sluice (tank-based monitoring)

IP2 trash racks (diver inspection)

IP3 trash racks (diver inspection)

other (describe):

Species Identification:

Shortnose Sturgeon

Atlantic Sturgeon

Unidentified Sturgeon

Condition of Fish:

Alive

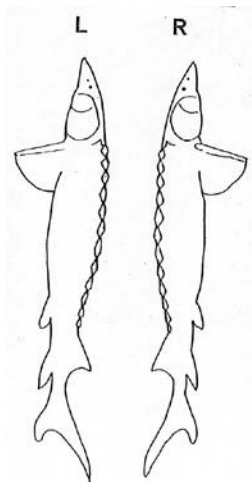

Dead

If Alive:

Alert and Active

No Apparent Injuries

Injured (describe injuries in box below)

identify location of any injuries

Identify location of any injuries

If Dead:

Fresh Dead

Moderately Decomposed

Severely Decomposed

Dried

Skeletal

Species Condition Key

Fresh Dead – no foul smell

Moderately Decomposed – scutes and skin are intact or just beginning to peel, internal organs intact

Severely Decomposed – foul smell with scutes lifting or gone, skin peeling, internal organs beginning to liquefy

Dried carcass – leathery, internal organs have decomposed

Skeletal remains – bones only

Fish Measurements in centimeters:

Total Length

Fork Length

Interorbital Width

Mouth Width

Tag Information:

PIT Tag Detected

If Yes: PIT Tag Number:

If No: PIT Tag Number Inserted

Other Tags Observed

Fish Disposition:

Returned to river via net

Returned to river via fish-return sluice

Held in cold-storage pending further instructions

Transferred to

Unique ID to accompany fin clip/genetic sample:

Part II - For Tank Based Monitoring

Time of monitoring start

Water temperature in the tank (°C)

Describe operating conditions at time of fish collection (operating status of service water and cooling water pumps)

Part III – Diver Survey Information

Water Temperature at Trash Rack (°C)

Tidal State during dive inspection

Debris load

High

Medium

Low

None

Describe operating conditions at time of survey (operating status of service water and cooling water pumps)

Part IV – Chain of Custody

Fin Clip/Genetic Sample
