

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION IV
1600 EAST LAMAR BOULEVARD
ARLINGTON, TEXAS 76011-4511

March 1, 2018

Mr. Robert S. Bement
Executive Vice President Nuclear/
Chief Nuclear Officer
Arizona Public Service Company
P.O. Box 52034, MS 7602
Phoenix, AZ 85072-2034

SUBJECT: ANNUAL ASSESSMENT LETTER FOR PALO VERDE NUCLEAR
GENERATING STATION UNITS 1, 2 AND 3 (REPORT 05000528/2017006,
05000529/2017006, AND 05000530/2017006)

Dear Mr. Bement:

The U.S. Nuclear Regulatory Commission (NRC) has completed its end-of-cycle performance assessment of Palo Verde Nuclear Generating Station Units 1, 2, and 3, reviewing performance indicators (PIs), inspection results, and enforcement actions from January 1, 2017 through December 31, 2017. This letter informs you of the NRC's assessment of your facility during this period and its plans for future inspections at your facility. The NRC concluded that overall performance at your facility preserved public health and safety.

The NRC determined the performance at Palo Verde Nuclear Generating Station Units 1, 2, and 3 during the most recent quarter was within the Licensee Response Column, the highest performance category of the NRC's Reactor Oversight Process (ROP) Action Matrix, because all inspection findings had very low safety significance (i.e., Green), and all PIs were within the expected range (i.e., Green). Therefore, the NRC plans to conduct ROP baseline inspections at your facility.

The enclosed inspection plan lists the inspections scheduled through December 31, 2019. This updated inspection plan now includes planned security inspections which were formerly transmitted under separate correspondence. The NRC provides the inspection plan to allow for the resolution of any scheduling conflicts and personnel availability issues. Routine inspections performed by resident inspectors are not included in the inspection plan. The inspections listed during the last twelve months of the inspection plan are tentative and may be revised. The NRC will contact you as soon as possible to discuss changes to the inspection plan should circumstances warrant any changes.

By letter dated July 19, 2017 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML17200D162), your staff submitted a License Amendment Request to adopt Title 10 of the Code of Federal Regulations Section 50.69, Risk-informed Categorization and Treatment of Structures, Systems and Components for Nuclear Power Reactors. Following issuance of the NRC Safety Evaluation Report (SER), the NRC will conduct Inspection Procedure 37060, "10 CFR 50.69 Risk-Informed Categorization and Treatment of Structures, Systems and Components Inspection," at Palo Verde Nuclear

Generating Station. The purpose of this inspection is to determine whether your staff: (1) properly incorporated the license amendment under 10 CFR 50.69 as approved by the NRC staff and described in the plant safety evaluation and Updated Final Safety Analysis Report (UFSAR) and documented in the staff's SER; (2) properly implemented the 10 CFR 50.69 categorization process consistent with the regulatory requirements for the structures, systems, and components subjected to the process; and (3) properly implemented alternate treatment requirements for those structures, systems, and components evaluated using the 10 CFR 50.69 categorization process. The inspection at your site has not been scheduled yet, but is expected to occur sometime in 2019. The NRC will coordinate with your staff to schedule a date for this inspection.

In accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Please contact me at (817) 200-1173 with any questions you have regarding this letter.

Sincerely,

/RA/

Geoffrey B. Miller, Branch Chief
Projects Branch D
Division of Reactor Projects

Dockets: 50-528; 50-529; 50-530
Licenses: NPF-41; NPF-51; NPF-74
