

2. Road access and telephone from Blue Star Hwy to CPO's property line
3. Road access from CPO's property line to and including Switchyard parking lot
4. Road access for construction vehicles from Blue Star Hwy to regular service drive
5. Land under and surrounding meteorological tower including ground well
6. Power line consisting of 350 MCM aluminum cable with concentric neutral buried 30 inches deep from switchyard control house to meteorological tower. Easement includes rights to traverse under switchyard.
7. Communication link (underground) from meteorological tower to Switchyard Plant
8. Power lines (345 kV) from Plant with easement from CPO's property line to connection with CPO's switchyard for lines which terminate between circuit breakers 2AR3 and 2AR5
9. a. at "R" bus with disconnect switch 2AR2
10. b. at "R" bus at disconnect switch 2AR2
11. 8. Underground cable (2.4 kV) from Plant with easement from CPO's property line to connection at disconnect switch at "F" bus (Safety Transformer)
12. Control cables to operate disconnect switches and circuit breakers from CPO's property line to connection in switchyard control house
13. Two control cables (500 MCM copper) for line towers to plant. Easement from switchyard fence to CPO's boundary line
14. Road access to meteorological tower
15. Power line, underground and overhead, from switchyard to radiation waste building
16. Power lines underground to Service Wells 3 and 4
17. Intake and outlet easements into Lake Michigan

15. Road access through GENCO's property to CPCo's property line at access road to switchyard.
- 16a. Land use restrictions for CPCo property east of switchyard.
- 16b. Evacuation of triangular exclusion area (includes switchyard) at GENCO request for emergencies at the plant.

NOTE:
TO RELATE THE COORDINATE VALUES SHOWN HERE
ON TO THE MICHIGAN PLANE COORDINATE SYSTEM SOUTH
ZONE ADD 301,000.00 TO THE NORTH COORDINATE FOR Y
AND ADD 1,461,000.00 TO THE EAST COORDINATE FOR X.
