Dear Mr. Berry:

SUBJECT: EDDY CURRENT METHODOLOGY - TEST QUALIFICATION PROGRAM (TAC 69344)

On April 13, 1989, a meeting was held at Jackson, Michigan between the staff and Consumers Power Company (CPCo) to discuss the status of the MIZ-18 eddy current system qualification program. The meeting was attended also by Mr. C. Dodd of Oak Ridge National Laboratory. Mr. Dodd is a consultant to the staff on eddy current test technology. Mr. Dodd's report of this meeting is enclosed.

At the time the meeting was held, the CPCo program was not yet completed; however, based upon the April 13, 1989, discussions the staff and Mr. Dodd concluded that the CPCo qualification program was addressing the appropriate issues satisfactorily. By letter dated August 30, 1989, CPCo documented completion of the MIZ-18 qualification program and provided a description of the results. In view of our findings from the April 13, 1989, meeting and the successful application of MIZ-18 during the fall 1989 steam generator inspections, we do not plan any further review of the August 30, 1989, submittal. Therefore, all review actions under TAC 69344 are completed.

Sincerely,

Original signed by

Albert W. De Agazio, Sr. Project Manager
Project Directorate III-1
