Dear Mr. Lawyer:

Thank you for your prompt consideration of the referenced license amendment request regarding proposed nuclear gauge storage at our relocated Dover Regional Office located at 1060 South Governors Avenue, Suite 101, Dover, Delaware 19904.

We are hopeful that the following supplemental information will successfully address your amendment related questions:

- The new Dover Regional Office building is a single story concrete slab-on-grade building with no usable overhead space. It also has no basement or crawlspace. Therefore, public dose or security related to overhead or underlying locations in the vicinity of the proposed gauge storage cabinet location is not applicable to this facility.
- Following the change of the company's organization (as indicated in the organizational chart provided with the amendment), please remove W. Hank Stack as main contact. Please address future correspondence and inquiries to:
