DOCKET 50-255 - LICENSE DPR-20 - PALISADES PLANT -
SHUTDOWN COOLING TECHNICAL SPECIFICATIONS CHANGE REQUEST REPLACEMENT PAGES

Enclosed please find proposed Technical Specifications page 3-82 altered to include an explicit shutdown action as part of footnote (r), as was discussed with the NRC Palisades Project Manager and our licensing staff. This page should replace the page 3-82 submitted in March 17, 1992 Technical Specifications change request. The revised page is included as Attachment 1.

The above changes are more conservative than those proposed by our September 2, 1988 letter; and, therefore, in view of the no significant hazards consideration submitted at that time, involve no significant hazards.

Gerald B. Slade
Plant Manager

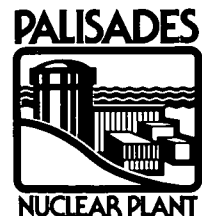

CC Administrator, Region III, USNRC
NRC Resident Inspector - Palisades
