DOCKET 50-255 - LICENSE DPR-20 - PALISADES PLANT -
1993 ANNUAL REPORT OF FACILITY CHANGES, TESTS AND EXPERIMENTS

This letter provides the Palisades Plant Annual Report of Changes, Tests and Experiments for calendar year 1993. This report is submitted in accordance with 10 CFR 50.59(b)(2).

Attached is a listing of changes to the facility (Facility Changes, Specification Changes, Temporary Modifications, and other documents) processed in 1993. The listed Safety Evaluations were prepared in support of ongoing design and approval processes. All the listed items have not necessarily been installed and declared operable. When these changes are completed, they will be included, if appropriate, as part of a regular FSAR revision.

Changes to the procedures are not itemized in this report because of the very large number and most were of little significance. Safety Evaluations supporting procedure changes are available on site for NRC review.

In the context of 10 CFR 50.59, none of the activities are classified as test or experiments.

David W. Rogers
