**DOCKET 50-255 - LICENSE DPR-20 - PALISADES PLANT - RESCHEDULE OF 1994
REFUELING OUTAGE UNTIL 1995**

Prior to the 1993 refueling outage, the Palisades plant's operating schedule forecasted that a refueling outage for the plant would occur in 1994. Because of the extended 1993 refueling outage, and the 118 day forced outage that occurred during the first half of 1994, the next refueling outage will not occur until 1995.

In various letters we have committed to actions that would be completed during the "next" refueling outage. In some cases we have referred specifically to a 1994 refueling outage.

To avoid confusion over refueling outage commitments, we are informing you via this letter that those actions which refer to a 1994 refueling outage, will be completed during the next refueling outage, which is presently scheduled to occur in 1995.
