COMMENTS ON PROPOSED GENERIC LETTER; RELOCATION OF THE PRESSURE TEMPERATURE
LIMIT CURVES AND LOW TEMPERATURE OVERPRESSURE PROTECTION SYSTEM LIMITS

Consumers Power Company's Palisades Plant has reviewed the proposed generic letter on the relocation of the pressure temperature (P/T) limit curves and low temperature overpressure protection (LTOP) system limits from the Technical Specifications and offers the following comments. The relocation of the P/T and LTOP system limits from the technical specifications will allow licensees to more efficiently and cost effectively maintain these parameters. The requirement for developing the limits with NRC approved methodology still assures that the health and safety of the public is preserved. This proposed generic letter and its voluntary recommendation meet the needs of both the regulator and licensee. Therefore, the Palisades Plant supports the issuance of this proposed generic letter.
