Reference: NRC License SUB 1536, Docket No. 040-08994

Dear Ms. Sara Forster:

Per the NRC letter dated January 30, 2018, we reviewed the letter and Amendment 11 of the license.

We noticed in the letter that our Mail Stop (MS) in the address line was listed as MS685, the correct MS is 485. Please correct this in your records to prevent any delays in receiving your correspondence.

We also noticed that inventory specifics were added to the amendment which were not in our past amendments. The Army does not maintain inventories by radionuclides, quantities, manufacturer's name and model numbers for the Abrams tanks. Much of that information considered sensitive. The Army tracks the Abrams tanks in a running inventory rather than a dated annual inventory.

We respectfully request the above be taken under consideration with a change to amendment 11 addressing the concerns.

If you have any questions on the above, please direct your responses to Ms. Karen L. McGuire, TACOM Radiation Safety Program Manager at 586-282-7635.

Sincerely,

A handwritten signature in cursive script that reads "Patrick J. Kelley".

PATRICK J. KELLEY
Director, Safety Engineering Office

Ms. Forster,

Good Morning! We reviewed the NRC transmittal letter and amendment 11 of the license, that was issued in January. We saw some areas that we needed corrected. Please see the attached letter detailing our concerns.

Please let me know if you need the attached letter sent hard copy and if you need any additional information.

Thank You,
Karen
