---

Duane and Chris-

Attached is the current NRC staff draft of the proposed revisions to WRT's license. The attachment documents the NRC staff's proposed changes in redline/strikeout from SUC-1591, Amendment 1, WRT's current license. The numbers of license conditions that have been stricken are the numbers of license conditions from Amendment 1 to facilitate traceability. Be advised that these proposed changes are draft and may change until the license is signed by NRC. Also, I will be placing a publicly available copy of this email and the attachment into ADAMS.

I will be travelling to Rockville this coming week, so it's best to reach me by email. I will be tied up for most of the day all week, but can make myself available after 5:00 ET any evening this coming week to answer any clarification questions you may have on the proposed changes if that would be helpful.

Chris
