Subject: Correction to Amendment Request dated February 13, 2018

It was noted by your office that the current version of NUREG-1556 was not referenced in our request letter dated February 13, 2018 sent to your office to make an amendment to our Nuclear Regulatory Commission License No. 19-05748-03 (Docket No. 030-06929).

The following are the corrections to our February 13, 2018 request:

1. Change the last sentence of the first paragraph of the Request Letter to read: *"Also we are requesting a change to the "Authorized Use" statement on the license to allow for the irradiation of small quantities of flammable material as defined in Appendix D of NUREG-1556, Volume 6, Revision 1."*
2. Change the last sentence of the first paragraph under Item 6 to read: *"There will be no irradiation of explosives and no irradiation of more than small quantities of flammable materials (as defined in Appendix D of NUREG-1556, Volume 6, Revision 1) with a flash point below 60°C (140°F) without specific written permission from the NRC."*

If you have any questions, please contact Goddard's Radiation Safety Officer, Dan Simpson, at (301) 286-0280 or daniel.s.simpson@nasa.gov.

A handwritten signature in black ink that reads "Daniel S. Simpson".

Daniel S. Simpson
Goddard's Radiation Safety Officer
