ShaKeia M. Reese
Radiation Safety Officer
U.S. Steel Corporation
Gary Works
1 North Broadway MS 91E-2
Gary, IN 46402

Dear Ms. Reese:

Enclosed is Amendment No. 9 to your NRC Material License No. 13-26104-03 in accordance with your request. Please note that the format of your license has been changed due to our new licensing process.

Please within 30 days of receipt of this letter submit a facility diagram showing the location of the bunker where gauges will be kept when in storage. Include on the diagram the use of adjacent areas, including above and below as applicable, and any information relevant to ensuring that dose to members of the public is kept within the limits described in 10 CFR Part 20.1301.

Items 6-9 on your license have been updated in accordance with your request and the applicable Sealed Sources and Devices Registries. Additionally, the following License Conditions have been updated in accordance with our licensing policy: Condition 11 regarding the training requirements for users, Condition 13 regarding the leak test requirements for sealed sources, Condition 15 regarding the biannual inventory requirement, and Condition 16 B. regarding record keeping of on-off mechanism (shutter) test results. The Sealed Source and Device Registries describe some of the devices authorized on your license as portable moisture gauges, therefore License Condition 24 and Condition 25 regarding cleaning and routine maintenance, and gauge barriers have also been added to your license. Lastly, License Condition 24, as described on License Amendment No. 8, regarding transportation requirements has been deleted as these requirements are already specified in the regulations in 10 CFR Part 71.

Additionally, please note that your request to authorize non-routine maintenance to respond to a caster overfill is not authorized in Condition 17.A as records have not been provided to show that the workers performing this procedure have had adequate training.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities. NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 Code of Federal Regulations 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Laura B. Cender
