2443 Warrenville Road, Ste 210
Lisle, IL 60532-4352

Re: Additional Information Control # 602241
Genesys Regional Medical Center

Dear Ms. Casey:

We would like to address the issues requested by your letter for additional information February 1, 2018.

- 1) The only material possessed at this facility for 35.400 were I-125 and Pd-103 seeds and strands.
- 2) These materials were delivered to the nuclear medicine department. I-125 and Pd-103 seeds and strands were taken to the 2nd floor cysto (#4) room, where they were implanted in patients. Any leftover I-125 seeds were stored for decay in the nuclear medicine hot lab prior to 2007. After 2007 strands of seeds were used and there were no seeds leftover for decay. All the strands were implanted in the patients.
- 3) The last date of use for any brachytherapy was 10/22/14. Any seeds from 2007 have been disposed of after decaying to background levels. All surveys were at or below background and wipe tests of storage area below 200 dpm.

Thank you for your cooperation with this matter. If you have any questions or require additional information please contact our physics consultant, Laura M. Luna, at (734) 662-3197 or email at lluna@mpcphysics.com.

Sincerely,

Joy M. Finkenbiner
Vice President, Operations
