Public Service Electric and Gas Company
 ATTN: Mr. Frank P. Librizzi
 General Manager - Electric Production
 80 Park Place
 Newark, New Jersey 07101

Gentlemen:

This office has received a copy of your June 29, 1978 application for amendment to Facility License No. DPR-70 for Salem Unit 1 which you filed with the Office of Nuclear Reactor Regulation. The application is for proposed changes to Radiological Safety Technical Specifications (Appendix A) and Environmental Technical Specifications (Appendix B) which involve the Moderator Temperature Coefficient, High and Low Pressure Safety Inspection Throttle Valve Testing, the Pressurizer Overpressure Protection System and the RTDs for Monitoring Condenser Inlet and Outlet Temperatures. An application fee of \$1,200 for a Class II amendment was forwarded with your letter of June 29 because you viewed the requested changes as having no safety or environmental significance.

We have determined from our preliminary review that the requested actions involve a Class III (\$4,000) amendment because the Overpressure Protection Technical Specification change involves a single safety issue, and a Class II (\$1,200) amendment because the other changes are administrative in nature and are unrelated to the overpressure protection review. You should forward the additional \$4,000 promptly to this office. Fees are payable to the U.S. Nuclear Regulatory Commission by check, draft, or money order. If after the final evaluation of your application is completed it is determined that it was incorrectly classified, you will be refunded any overpayment or billed for any additional amount due.

If we can be of assistance to you, call 301/492-7225.

Sincerely,

Original Signed by:

Reba M. Diggs
