On January 26, 2018, the U.S. Nuclear Regulatory Commission (NRC) staff held a Category 3 public meeting with external stakeholders in Rockville, Maryland. The purpose of the meeting was to discuss draft Regulatory Issue Summary (RIS) 2002-22, Supplement 1, "Clarification on Endorsement of Nuclear Energy Institute Guidance in Designing Digital Upgrades in Instrumentation and Control Systems," (Agencywide Documents Access and Management System (ADAMS) Accession No. ML18023B372).

The NRC made brief opening remarks, and introductions were made by all in attendance. The NRC staff presented an overview of changes made to the draft RIS since it was last published in the *Federal Register* for public comment on July 3, 2017 (82 FR 30913). After the presentation, external stakeholders were afforded the opportunity to provide comments on the draft RIS. The specific details of the meeting were transcribed. A copy of the meeting transcript, which includes a list of meeting attendees, can be found in ADAMS at Accession No. ML18079A417. The slide presentation for this meeting can be found in ADAMS at Accession No. ML18075A385. The meeting agenda is enclosed.

The NRC staff made no decisions or took any agency positions during this meeting. All comments received after the comment period, as indicated in the July 3, 2017 *Federal Register* notice, have been captured by the NRC staff and made publically available in ADAMS at Accession No. ML18039A804. As a result of this meeting the Nuclear Energy Institute requested three weeks to review the draft RIS and provide their comments to the NRC staff.
