Docket No. 50-272

JUN 27 1979

Public Service Electric and Gas Company
ATTN: Mr. F. W. Schneider
Vice President - Production
80 Park Place
Newark, New Jersey 07101

Gentlemen:

Subject: Inspection 50-272/79-02

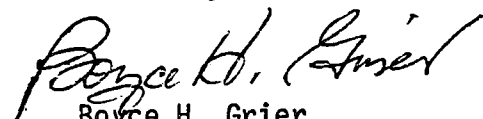

This refers to your letter dated April 6, 1979, in response to our letter dated March 15, 1979.

With regard to Items A and D, it should be noted that it is our continued understanding, as discussed in our letter to you dated May 18, 1978 and during our meeting at the NRC Region I office on February 23, 1978, that the plant computer printout records are the official condenser Δ T monitoring records. These are the records which were provided to our inspector for his review, and these records were the bases of these items of noncompliance. However, these items will be further reviewed during a future inspection and will be considered unresolved until that time.

Thank you for informing us of the corrective and preventive actions documented in your letter. These actions will be examined during a subsequent inspection of your licensed program.

Your cooperation with us is appreciated.

Sincerely,

Boyce H. Grier
Director
