

March 14, 2018

To Director,  
Nuclear Regulatory Committee (NRC) Office of Enforcement,

I formally withdraw my previous letter of intent (dated October 2, 2017) and my follow-up letter (dated January 23, 2018) requesting privacy from being made public.

Please consider this my official notice to return to NRC regulated activities, and in accordance with order IA-10-028 notice requirement. Please find the address and name of the entities that I will be involved with. Also, my commitment to abiding by all NRC regulations. My intended employer will be the following:

Metal Testing Services  
4942 W Shalecrest Rd  
Coeur d'Alene, ID 83814  
(406) 598-7403

As to the second requirement, I can simply say that I am completely committed to uphold the highest level of safety and total compliance and cooperation with the NRC regulations. I understand the power and authority of the NRC, as well as the paramount importance of safety within the NRC regulated activities. I fully understand that there are few assurances that I can make that will be believed until they have been tested and hold true. I am proud of my conduct during the duration of my prohibition and believe that it does bolster my statement of integrity.

In conclusion, I have worked hard to comply with my order fully, and I now look forward to safely returning to NRC related activities.

Respectfully,

A handwritten signature in black ink, appearing to read 'Mark Ficek', written in a cursive style.
