License Amendment Request

SUMMARY

This record refers to a phone conversation that occurred between Jack Niemi and Laura Cender on March 13, 2018 regarding a requested amendment to NRC License No. 21-32793-01.

In the letter dated January 29, 2018 you requested to remove two Seaman Nuclear Corporation radium portable gauges from your license. From our conversation today, my understanding is that you still currently possess one radium gauge that is pending disposal, and would like to withdraw your request to remove these two gauges from your license until a later date. Excluding the portion withdrawn, the remainder of the license amendment will be processed by the NRC as requested.

Laura,  
Wanted to update you on status. A PO has been in the approval process to dispose of the Seaman gauge. I will follow up with it this week to see if it can be moved along.

Hello Jack,

In your response to the NRC dated January 29, 2018 you requested to delete the byproduct material listed in Items 6.A-9.A of your license authorizing Radium-226 for use in Seaman Nuclear Corporation Model C-75 devices. Per our conversation today, my understanding is that your company has recently disposed of one device, and will be disposing of a second device in the next few weeks. Please provide a copy of the transfer or disposal record for each device, as well as a copy of the most recent leak test for each device.

Please feel free to submit your signed and dated response via email as this information is not considered security related. I can be reached at 630-829-9712 or via email if you have any questions.

Thank you,  
Laura
