I wanted to acknowledge our phone discussion about power outage at MU 5. If I remember the discussion correctly from Friday, Willow Creek lost power at MU-5 due to a wellfield issue (I forget the specifics) and then a power pole was snapped by wind that further delayed the repair and restoration of power. As a result, no bleed resulted for a few days at MU 5-2, and it make take a few more days to restore power and continue the bleed at MU 5-2. Please update as necessary.

Thanks

Ron
