Docket No. 50-311

APPLICANT: Public Service Electric and Gas Company

FACILITY: Salem Nuclear Generating Station, Unit 2

SUBJECT: SUMMARY OF MEETING TO DISCUSS PROPOSED TECHNICAL SPECIFICATIONS

On August 19, 1980, members of the NRC staff met with the Licensee to discuss the above subject. Attendees are listed in the enclosure.

The Licensee discussed the proposed technical specifications (T.S.) for Salem 2. The Licensee's concerns fell into three major categories:

- 1) T.S. which were not applicable to Salem 2 because of a difference between the unit and a standard Westinghouse plant;
- 2) T.S. for which the interpretation was not clear; and
- 3) T.S. which the Licensee asked for modifications because of difficulty in implementation.

The difficulties with the T.S. in the first two categories were resolved in the meeting to both the staff's and the Licensee's satisfaction. For the T.S. in the third category, D. Vito made a commitment to discuss the Licensee's concerns with the appropriate reviewers and to inform the Licensee of the staff's final position at a later date.
