Licensing Branch 3
Division of Licensing

Mr. Steven A. Varga, Chief
Operatoring Reactors Branch 1
Division of Licensing

Gentlemen:

POST-TMI REQUIREMENTS FOR THE EMERGENCY OPERATIONS FACILITY
NO. 1 AND 2 UNITS
SALEM NUCLEAR GENERATING STATION
DOCKET NO. 50-272 AND 50-311

In response to your letter of February 18, 1981 requesting confirmation of implementation dates for the upgraded Emergency Response Facilities, we provide the following information:

The facility conceptual design description will be provided by June 1, 1981, with the exception of the task functions of the individuals required to report to the TSC and EOF. PSE&G has just completed an Emergency Plan exercise and has identified some deficiencies which must be factored into the plan. Additionally, resource constraints due to the recent emergency planning licensing effort and correction of deficiencies would inhibit completion of the task functions by June 1, 1981. Therefore, we request a two months extension for this task, proposing to submit the task functions by August 1, 1981. At this time it is expected that the up-graded facilities will be operational by October 1, 1982.
