Director of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Mr. Frank J. Miraglia, Chief
Licensing Branch 3
Division of Licensing

Gentlemen:

OPERATING PERSONNEL AND STAFFING
SHIFT MANNING
SALEM GENERATING STATION
DOCKET NO. 50-311

Safety Evaluation Report related to the operation of Salem Nuclear Generating Station, Unit No. 2, Supplement No. 5, Section 22.2 Full Power Requirements, I.A.1.3 Shift Manning requires regularly scheduled eight hour shifts (without reliance on routine use of overtime) commence by June 1, 1981. In order to comply with NRC requirements for fire brigade members we utilize an established fire school for training the operating shift personnel in approved fire fighting techniques. We have previously scheduled the last shift to attend this training session on June 1 and 2, 1981. We, therefore, request that the previous commitment to begin regularly scheduled eight hour shifts without reliance on routine use of overtime be revised to commence by June 3, 1981.

Should you have any questions regarding this request, please do not hesitate to contact us.

Very truly yours,

R. A. Udery
