Docket Nos. 50-272
and 50-311

Mr. F. W. Schneider, Vice President
Production
Public Service Electric and Gas Company
80 Park Plaza, 15A
Newark, New Jersey 07101

Dear Mr. Schneider:

This letter documents the close-out for Salem Units 1 and 2 of four items from NUREG-0737, "Clarification of TMI Action Plan Requirements." We are providing this written notification at this time to ensure that PSE&G and the NRC continue to maintain clear and consistent records of the status of these items. Similarly, in the future we shall notify you of the close-out of each Action Plan item as it occurs.

The following four Action Plan items have been completed for Salem Units 1 and 2.

1. Item II.K.3.9 -- Your letters of December 15, 1980 (Docket No. 50-272) and May 20, 1980 (Docket No. 50-311) indicate you have taken the actions requested under item II.K.3.9 (PID Controller) of NUREG-0737. Therefore, this item is resolved for your facility.
2. Item II.K.3.10 -- Your letters of December 15, 1980 (Docket No. 50-272) and May 20, 1980 (Docket No. 50-311) indicate that no increase in the setpoint for the reactor trip on turbine trip is contemplated, and therefore item II.K.3.10 is resolved for your facility.
3. Item II.K.3.12 -- Your letters of December 15, 1980 (Docket No. 50-272) and May 20, 1980 (Docket No. 50-311) confirm that Salem Units 1 and 2 have an anticipatory reactor trip on turbine trip, in conformance with item II.K.3.12 of NUREG-0737. Therefore, this item is resolved.

4. Item II.E.4.1 -- Your letters of December 15, 1980 (Docket No. 50-272) and December 15, 1980 (Docket No. 50-311) confirms that Salem Units 1 and 2 have redundant recombiner systems inside containment and hence item II.E.4.1 is not applicable. Therefore, this item is resolved.

If you have any questions regarding the status of these items, please contact us.

Sincerely,

Original Signed By:

Steven A. Varga, Chief
Operating Reactors Branch No. 1
Division of Licensing
