SUBJECT: COMPLETION OF REVIEW FOR NUREG-0737 ITEMS I.A.2.1.4 AND
II.B.4.1 - SALEM NUCLEAR GENERATING STATION, UNITS NO. 1 & 2

During the Salem Unit 2 license review, as documented in Supplement No. 5 to the Salem Safety Evaluation Report (NUREG-0517), we concluded that PSE&G had satisfied the requirements of Item I.A.2.1.4 "SRO & RO Training Upgrade." In addition, in Supplement No. 5 we concluded that for Item II.B.4.1 "Training to Mitigate Core Damage," PSE&G had not completed all the requirements but would be expected to do so prior to operation above five percent power. Subsequent to this, the NRC's Office of Inspection and Enforcement verified that PSE&G had satisfactorily completed action on Item II.B.4.1.

It is our understanding that the training programs for Salem Units 1 and 2 are identical. On this basis, we consider Items I.A.2.1.4 and II.B.4.1 complete for both Salem Units 1 and 2.

Sincerely,

Original signed by:
S. A. Varga
