PG&E Letter HBL-18-006

REIRS Project Manager
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

10 CFR 20.2206

Docket No. 50-133, OL-DPR-7
Humboldt Bay Power Plant, Unit 3
No Annual Report of Occupational Radiation Exposure for Year 2017

REIRS Project Manager:

Based on the guidance in 10 CFR 20.1502, Pacific Gas and Electric Company (PG&E) performed an a priori dose assessment and determined that individual monitoring at Humboldt Bay Power Plant (HBPP) during calendar year 2017 was no longer required. Monitoring of work areas and occupied equipment likely to represent the highest exposed individual continued throughout 2017. The monitoring validates that the assumptions used in the dose assessment were acceptable. Individual monitoring is no longer required at HBPP. Therefore, no report was filed for calendar year 2017 in accordance with 10 CFR 20.2206(c).

PG&E makes no new or revised regulatory commitments (as defined by NEI 99-04) in this letter.

If you have any questions, please contact William Parish, Radiation Protection Engineer, at (707) 444-0878 or (707) 441-2641.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Jon A. Franke', is written over a blue horizontal line.

Jon A. Franke
