REGULATORY BUCKET FILE COPY

March 22, 1978
L-78-99

Director of Nuclear Reactor Regulation
Attention: Mr. Victor Stello, Director
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Stello:

Re: St. Lucie Unit 1
Docket No. 50-335
Proposed Amendment to
Facility Operating License DPR-67

In accordance with 10 CFR 50.30, Florida Power and Light Company submits herewith three (3) signed originals and forty (40) copies of a request to amend Appendix A of Facility Operating License DPR-67.

The purpose of this submittal is to support Cycle 2 operation of St. Lucie Unit 1. Associated Technical Specification changes are described in Section 9 of the Reload Safety Evaluation (RSE) and shown on the attached Technical Specification pages bearing the date of this letter in the lower right hand corner.

By letter dated February 2, 1978 (L-78-39), Florida Power & Light Company submitted proposed technical specifications pertaining to a clarification of the relationship between reactor trip system response time and Resistance Temperature Detector (RTD) response time as applied to Technical Specification 4.3.1.1.3. The letter indicated that the evaluation was applicable to Cycle 1A and would be reverified for Cycle 2 as part of the Reload Safety Evaluation. The applicability of the proposed change to Cycle 2 has been confirmed by the NSSS vendor.

L-78-99

The proposed amendment has been reviewed by the St. Lucie Facility Review Group and the Florida Power and Light Company Nuclear Review Board. They have concluded that it does not involve a significant hazards consideration. A Reload Safety Evaluation is attached. The RSE evaluates Cycle 2 design and performance and supports the proposed Technical Specification changes described above.

Very truly yours,

Robert E. Uhrig
Vice President
