Director of Nuclear Reactor Regulation
Attention: Mr. Victor Stello, Director
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Stello:

Re: St. Lucie Unit 1
Docket No. 50-335
Proposed Amendment to
Facility Operating License DPR-67

In accordance with 10 CFR 50.30, Florida Power & Light Company submits herewith three (3) signed originals and forty (40) copies of a request to amend Appendix A of Facility Operating License DPR-67.

This proposal has been prepared in response to a September 19, 1977 letter from Mr. Don K. Davis of your staff requesting that we submit a proposal to delete the requirement in our Technical Specifications for an Annual Operating Report. The proposed amendment is described below and is shown on the attached Technical Specification page bearing the date of this letter in the lower right hand corner.

Page 6-14

Specification 6.9.1 (Routine Reports and Reportable Occurrences) is revised to delete the requirement for an Annual Operating Report.

Mr. Davis' letter also requested that we concurrently modify the content of our required Monthly Operating Report in accordance with three revised formats which accompanied his September 19 letter. We plan to use the revised formats starting with our monthly report for January, 1978. Along with the three report formats, we will provide a monthly "Narrative Summary of Operating Experience" that describes the operation of the facility, including major safety-related maintenance. In lieu of the 1977 Annual Operating Report we will submit a one-time only "Narrative Summary of Operating Experience" for calendar year 1977. To accommodate submittal of the expanded monthly report without affecting our existing organization, we request that the due date be extended from the tenth to the fifteenth of each month following the calendar month covered by the report.

The proposed amendment has been reviewed by the St. Lucie Facility Review Group and the Florida Power & Light Company Nuclear Review Board. They have concluded that it does not involve an unreviewed safety question.

Very truly yours,

for Robert E. Uhrig
