Mr. James M. Allan, Acting Administrator Region 1
U.S. Nuclear Regulatory Commission
631 Park Avenue
King of Prussia, Pennsylvania 19406

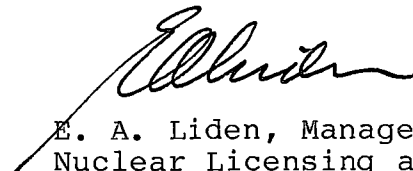

Dear Mr. Allan:

CHANGE IN RADIOLOGICAL ENVIRONMENTAL MONITORING PROGRAM
NO. 1 AND 2 UNIT
SALEM NUCLEAR GENERATING STATION
DOCKET NO. 50-272 AND 50-311

As required by Appendix B to our Facility Operating License DPR-70 and DPR-75 for the Salem Generating Station, we are informing you in accordance with Environmental Technical Specification 3.2.5 that milk samples can temporarily no longer be obtained from our environmental sampling location 3G1. We have been informed by the milk farm owner that his herd has contracted the contagious disease, Infectious Burcellosis. In accordance with the direction of local health officials, milk production will no longer be permitted at this location until the disease is brought under control. We are making arrangements to obtain milk samples at another farm located in approximately the same sector and distance as soon as it is confirmed that the livestock is free of the disease.

Should you have any questions in this regard, do not hesitate to contact us.

Very truly yours,

E. A. Liden, Manager
Nuclear Licensing and Regulation
